

## DECLARATION OF THE MANIFESTO OF THE INTERNATIONAL SCIFO CLOWN ASSOCIATION.

All are welcome to come give their all for loving others, for pleasure and for a world that could be free of violence and injustice in the sweet and playful care of all people everywhere. We welcome everyone so that each can find their loving, fun self. We also welcome everyone because we feel the world is in peril from a lust for money and power over and ultimately feel this can be changed with love ~~strategies~~ strategies of enough people. Historically it has not yet been tried (except by women) very much. We think clowning is a context where one can explore their love strategies on the widest variety of people everywhere. To do this is enchanting; one encounters an ease in the flow of love and fun. It seems differently delightful with a group of new and old friends. It is extremely easy, all you have to do is be friendly, in costume. Add skills and tricks as you feel curious and creative. I submit my research as photos of clown research in the field. We suggest that one is officially a scifo clown when they have completed 100 hours of field work, by submitting 5 photos, where at least one is classically scifo. A scifo clown can choose to do it anywhere and at any time. A scifo clown can be disgusting, rude (but nice), dopey, goofy, hilarious, strange, farting, showing underwear or worse... their butt. No harm is ever meant. In the native Americas where this character is called the contrary; in the western world, the fool, jester, trickster; which is to say that we'll use farts anytime (or be glad that someone did). The point is to use your compassion to perform in a clown costume, foolishly to promote life's many celebrations and to ease suffering. We feel the world needs more demonstrative love than ever, scifo clowns are love probes and alchemists for creating a public atmosphere of ease and welcoming. This is always easiest with wide participation which is why we like

travelling with all. ages, skills, and backgrounds. It becomes a random group of strangers (or old friends which are differently special trips) who become a group of new friends to go to have people everywhere. we go. we write a handbook to do it for free. we can imagine a world where everyone cared for everyone. No. such a world this kind of work could be called a way of. sunshine. This is. not a profession but a set of healthy attitudes. Each one who finds they are able, goes anywhere they wish and claims for 100 hours - in public, if at the end, of it, you realize you love it, then, you appoint your self safe down.

SAFE, ANYONE CAN DO IT, NO ONE WASTES.

Do it for the love of all people

just one safe
